- Met with the company's clients; developed the design framework for the respective websites by collating information on the clients; business goals and objectives.
- Conducted comprehensive research covering the industry, target market, and financial costs for the purpose of creating a budget for the project.
- Presented clients with a series of mockups for the website.
- Designed and developed high-quality websites using Microsoft, C+, and JavaScript.
- Closely collaborated with marketing and the software application development teams to ensure the website functions according to client expectations

2013-2015

NET DEVELOPER – Gray Website Designs

- Gray Website Designs is a company that I founded in my college years as a way to sharpen my design skills and as well as to develop an understanding of the business side of the process.
- Gray Website Designs has created a total of 140 websites that are all mobile-responsive.
- As the NET Developer, I handled the design and coding of the websites.
- Collaborated with Digital Marketer and SEO Professional to optimize the websites.
- Signed up 44 websites on the company's WordPress Care Package.
