## OBJECTIVE

I hope Resume\_Template will consider my application for the open position of Software Developer. I have more than 6 years' experience designing, developing and managing apps, system networks and technological infrastructure for companies across a wide range of industries. Creative, analytical and enthusiastic; a productive team player with a deep passion for technology, I have a bachelor's degree in computer engineering and a certified expert in C, C++, JavaScript, Python and Microsoft.

## EXPERIENCE

**Software Developer**  
2018-Present

### SYNERGY SOLUTIONS, INC

- Determines the primary courses of action for addressing the needs and concerns of Synergy Solutions' clients. The company's portfolio includes clients from the following industries: finance, entertainment, retail, business consultancy, law and healthcare.
- Presides over client meetings; guides them through the software development process, secures pertinent information about their target market, goals, objectives and budget.
- Designs, develops, tests and implements Internet-based solutions including apps, proprietary software programs, networking systems, data security/protection protocols and the appropriate technological profile for the entire infrastructure.
- Selects the composition of the software development team; collaborates with them throughout the course of the project.
- Tracks performance of the software solution; prepares, evaluates and discusses results with clients and if needed, proposes adjustments and/or improvements.

**Software Developer**  
2014-2018

### Trend Mark Developments

- Determined the feasibility of the proposed solution by conducting regular evaluations, audits and identification of strengths as well as pain points.
- Documented and demonstrated the advantages and key features of every engineered solution by creating flow charts, layouts, diagrams and documentation about the programming code.

**Software Developer (INTERN)**  
2013-2014

- Prepared and installed the solution into the network or framework of the client; thoroughly discussed design specifications and standards of programming.
- Routinely conducted systems analysis to ensure proper working order of all developed solutions.
- Secured the licenses and proprietary intellectual rights of every developed software to become the property of the client.

**MODERN ARTS SOFTWARES**

- Developed and implemented all software programs for clients of Modern Arts.
- Performed routine inspections, evaluations and analysis of software programs.
- Collaborated and tightly coordinated work responsibilities with colleagues at software development.
- Conducted the necessary research; market and financial studies to determine the overall feasibility of the proposed software solution.
- Prepared and turned over all documentation covering proprietary software programs to clients.

**EDUCATION**

**B.S Computer Engineering**  
2009-2013

**PELHEM COLLEGE**  
Denver, CO.
